PHILANTHROPY MOVES HOSPITAL FOR SPECIAL SURGERY FORWARD

JONATHAN AND LIZZIE TISCH

Visionary Gift Elevates Patient Care

HSS has received visionary support of \$10 million from Lizzie and Jonathan Tisch to support HSS expansion and construction of the Kellen Tower, the centerpiece of our main campus transformation into a hub for complex care. In addition to clinical and physician practice spaces, the Kellen Tower will have 36 private inpatient rooms on three specialized floors. The fifth floor of the new building will be named Tisch 5 in recognition of their incredible commitment. Tisch 5 will house 11 private rooms with special amenities

and detailed finishes to make the patient healing experience unique.

“Lizzie and I are proud to help ensure that people who come to HSS for the best physicians in the world for orthopedics can experience the highest level of personalized care,” said Jonathan Tisch. “Every detail of Tisch 5 is being thoughtfully planned to give patients and families an optimal environment for recovery and an unparalleled experience.”

A Message From Our President & CEO

During my 27-year tenure at HSS, it has been my privilege to be a surgeon, scientist, leader, and part of an extraordinary team. Together we have propelled HSS to be the global leader in musculoskeletal health. And now I am honored to guide HSS into the future, alongside Doug Padgett, MD, Surgeon-in-Chief.

Our core mission is to be the best place in the world for patients and their families to receive the highest-quality musculoskeletal care and the best place in the world for professionals across our industry to grow their careers. To achieve this, we are centralizing complex care on the main campus while providing HSS expertise closer to where people live in regional locations. We are advancing research and incorporating technology and innovation to drive new discoveries and better outcomes. We are educating future leaders in orthopedics and rheumatology. And we are ensuring that our team is empowered with the training and resources they need to be the best for our patients.

Philanthropy sustains our vital work. In this issue of *Your Impact*, we highlight visionary donors and strategic initiatives that are shaping the HSS of the future. It has been the partnership between clinicians, scientists, and philanthropists, with a shared vision for helping patients, that has enabled this organization since its founding in 1863, and will continue to do so well into the future.

With gratitude for your support,

Bryan T. Kelly, MD, MBA

Visionary Gift Elevates Patient Care

(continued from page 1)

Mr. Tisch is a member of the HSS Board of Trustees and serves on the Board's Kellen Tower Task Force, providing leadership and oversight to the project. As Co-Chairman of the Board of the Loews Corporation and Executive Chairman of Loews Hotels & Co., Mr. Tisch is a renowned leader in the hospitality industry. His expertise will be invaluable in informing the design, material finishes, and aesthetics of the physical environment of Tisch 5 to ensure that each room will be beautifully appointed with patient comfort and safety at top of mind.

With Mr. and Mrs. Tisch's recent gift of \$3 million for HSS expansion in West Palm Beach, this brings their support of the current capital campaign to \$13 million and builds upon their long-standing dedication to HSS and vision for elevating the care of patients. Together with other members of the Tisch family, they have supported the expansion of facilities for HSS sports medicine care and research.

"We are deeply grateful for Lizzie and Jonathan's extraordinary generosity," said Bryan T. Kelly, MD, MBA, HSS President and CEO. "Their commitment will help HSS set new standards of excellence in providing for the health and comfort of our patients and families."

Main Campus Transformation Update

Construction of the HSS Kellen Tower is well underway. Steel modules comprising the first two floors were transported and installed where the Kellen Tower will stand on 71st Street (as seen in the photo above).

Expanding Our Reach: HSS Florida

The first HSS Florida location opened in West Palm Beach in 2020 to meet the needs of a growing community of patients from across South Florida and all over the Southern U.S. Since then, HSS in West Palm Beach has become the preferred destination for top-quality, comprehensive musculoskeletal services in sports medicine, joint replacement, hand and upper extremity, physiatry, radiology, and trauma, handling more than 20,000 office visits and 12,000 rehabilitation visits last year.

Earlier this year, healthcare leader Tara McCoy was appointed as HSS Florida CEO to oversee strategy and growth for the region. Plans include expanding clinical and administrative spaces and recruiting world-class talent in primary sports medicine and spine surgery and other areas to ensure that the best in all orthopedic specialties can be found in Palm Beach County. And HSS recently announced a partnership with Naples Community Healthcare System to establish a new hub for care on the west coast of Florida that will open there in 2025.

In addition to expanding the clinical team, HSS Florida is growing its research enterprise to generate new knowledge to improve care. Our team is advancing investigations in areas such as robotics in joint replacements, wearable technology to monitor progress after surgery, and new surgical techniques to bring leading-edge treatment to patients. These efforts underscore our commitment to improving the health and vitality of the entire Florida community and beyond.

Celebrating 20 Years of the Greenberg Center for Skeletal Dysplasias

Since 2003, the Kathryn O. and Alan C. Greenberg Center for Skeletal Dysplasias has been an unmatched source of expertise, providing unsurpassed care for patients of all ages with genetic disorders that affect bone and cartilage. Skeletal dysplasia refers to more than 400 genetic conditions that affect the size and shape of the limbs, trunk, and/or skull. Many people with a skeletal dysplasia have disproportionate short stature and can have various orthopedic problems, such as fractures because of brittle bones.

The extraordinary partnership of HSS Life Trustee Kathryn Greenberg and her late husband, Alan, made this Center possible. It is the only comprehensive medical center in the Northeast that treats patients across their lifetime, from infancy to adulthood. Since its inception, the Center's multidisciplinary team has delivered ongoing, vital care to more than 800 people, and continues to improve their quality of life through research, education, and patient advocacy.

Corporate Partners Making an Impact

BIKE HSS 2023 (our one-day cycling MOVEment) raised a record-breaking \$2.4 million to advance patient care, research, and education. Since 2019, more than 35,000 donors and 1,600 riders have given nearly \$7 million through BIKE HSS.

HSS leadership with Carlos Cornejo, SVP, Mastercard (from left to right: Andrew Pearle, MD, Catherine Callagy, Mark Figgie, MD, Bryan T. Kelly, MD, MBA, Joel Press, MD, Carlos Cornejo, David Mayman, MD)

As the Presenting Sponsor for BIKE HSS since the event’s inception, Mastercard has been an unwavering supporter, having given a total of \$1 million to HSS. Each year, they have also fielded a team of riders and volunteers. “We could not ask for a better partner than Mastercard in making BIKE HSS the success it is today. This incredible event brings the community together—patients, physicians, supporters, and friends—to put the HSS mission into motion,” said Bryan T. Kelly, MD, MBA, HSS President & CEO.

Through BIKE HSS, Mastercard is making a difference for the countless people who will benefit from our groundbreaking research, exceptional care, and training of future leaders in musculoskeletal health. ■
