

Floating Gallery Shelf - 115cm

Design: Norm Architects & Nikolai Kotlarczyk

Included with shelf:

3 x 6 mm x 110 mm screws

3 x 8 mm x 50 mm wall plugs

Please consider if included screws and plugs are suitable for wall on which you are hanging, change if required.

Produced from European origin, FSC certified Oak and polished stainless steel. Designed to support artworks and small objects only. We recommend placing items with **no more than 12kg** of weight per shelf.

Do not lean frames greater than 1m in height to prevent artwork tipping.

Polished Stainless Steel Front

Prior to installation, remove protective film from polished front and clean away any excess residue from front and edges. To clean polished stainless steel front use dishwashing liquid, warm water and a non-abrasive cloth to wipe, and to dry.

Installation instructions

1. To install, simply measure and level three 8mm diameter holes, 420 mm apart.

2. Install included plugs (consider alternative plugs based on wall type) and use extension drill piece to firmly drill shelf to wall. We recommend finishing installation with a hand-held screw driver to ensure a strong fixing.
3. When placing shelves side by side, we recommend an 80 mm gap between shelves, providing a small gap between magnetic fronts.

WARNING - magnetic fronts are not structural, do not lean art or hang items on or from magnetic front. Frames to sit in groove in shelf.
