Retrotouch®

Switches & Sockets

Retrotouch is a UK company that designs, and manufactures innovative switches & sockets for consumers, interior designers and developers. Founded in 2008, we are a team of designers and engineers. The consumer range is designed for the homeowner who wants the utmost in modern sophistication at a price which is affordable and easy installation and with design a priority.

Retrotouch products don't require expensive and time-consuming rewiring or complicated installations, and thanks to the continuity of the ranges, you can start small and add over time. With touch glass panels and surrounds, the switches and sockets bring a stylish finish to a room and give you the power to create ambience and mood lighting wherever and whenever you wish. There's no need for expensive controllers and transmitters as all of Retrotouch's light switches have the technology already built-in.

Our philosophy has always been that "We work forwards from what our customer needs are, and not backwards from what the technology allows. Everything we sell must be simple and intuitive to use for everyone from the installer to the whole family."

FRIENDS OF HUE SMART SWITCHES

WITH A TOUCH OF GLASS™

SWITCHES FOR HUE.

Retrotouch has become an official supplier of Philips Hue light switches, working together to provide consumers with a beautifully-designed 'always on' system for effortless control over their Philips Hue lighting.

Addressing the issue of a homes wireless smart lighting connections being cut off from smart functions, if a light switch is manually switched off, the new Retrotouch switches ensure that the lighting circuit is always on. While the switches will work as normal to flip lights on and off, the lighting circuit will remain on so that Hue is always ready and working when you want it, seamlessly delivering smart App, HomeKit and motion functions.

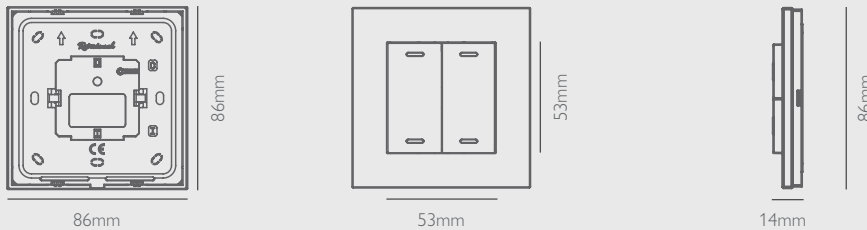

SPECIFICATIONS / FEATURES

Seamlessly integrate with the Phillips Hue lighting system, this switch is the missing piece of the Hue system jigsaw for a user experience that works from wall, voice, motion or app.

ALWAYS ON HUE EXPERIANCE.

Features

- Wireless, stick-anywhere, battery-free switch**
Can control up to 50 Philips Hue lights and lamps simultaneously from a Hue hub.
- Ensures that the Hue lighting system is always-on**
no more having to leave a light switch on for the lamps to have power and hue system work.
- Switch connects directly to the Philips Hue Bridge**
No additional Smart Home Hub is needed.
- Stylish, premium glass design**
to perfectly complement the smart Philips Hue system
- Certified Friends of Hue**
Compatible and certified to work with all Philips Hue lighting
- Works with Apple Homekit**
Compatible with Apple HomeKit via Hue Bridge. Take control of your home from your walls.

WIRELESS KINETIC SWITCHES

WITH A TOUCH OF GLASS™

WIRELESS. BATTERY-FREE. TIMELESS.™

The Retrotouch EnOcean switches don't require batteries or a power cable and they are as durable and reliable as a traditional wired switch. Thanks to EnOcean's innovative harvesting technology, each press of the switch generates enough energy to send a radio signal to a relay for a totally wireless and robust control solution.

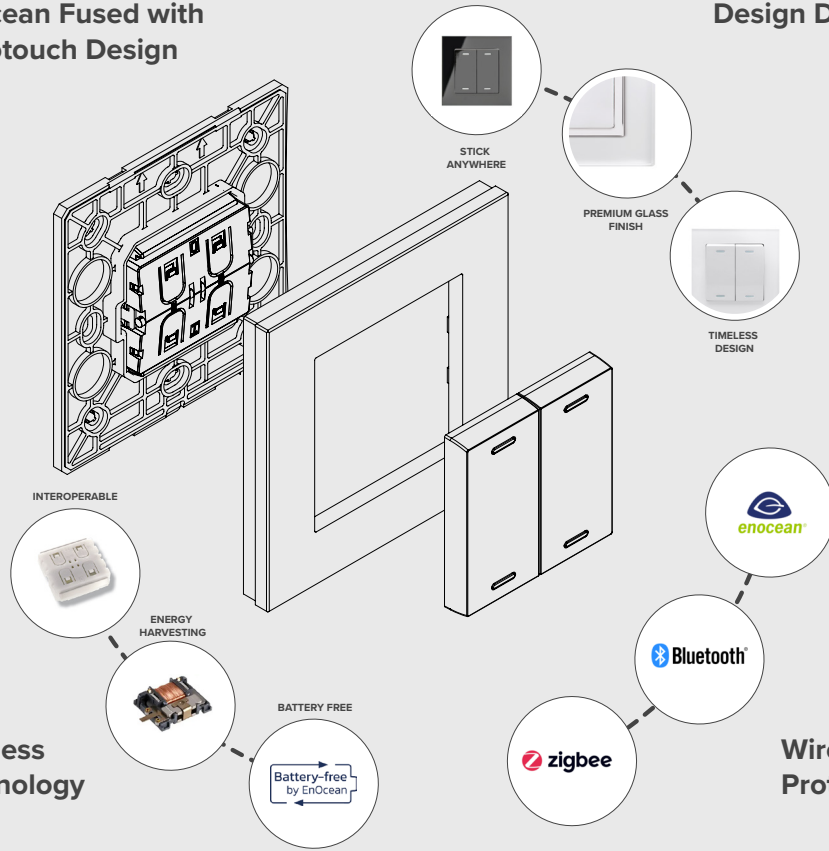

SPECIFICATIONS / FEATURES

Powered by EnOcean's energy harvesting technology, each press of the switch generates enough energy to send a radio signal to a relay for a totally wireless and battery-free solution.
